

# John Deere Field Connect Get the most from every drop of water

With today's water issues  
we can help you:

- USE LESS WATER
- INCREASE YOUR YIELDS
- SAVE YOU MONEY

## HOW IT WORKS

• John Deere Field Connect uses field-installed probes to monitor moisture levels at various depths. It then sends the information to a web-based interface where you can see the data on your computer or mobile device, so you can make timely irrigation decisions from anywhere.
